

On-site Stormwater Detention (OSD) Tanks

If your construction project requires the quick installation of a stormwater detention system, Panther Concrete Tanks has the perfect range of delivered to site, concrete tank solutions to suit your requirements.

These pre-fabricated, 8,000 litre concrete tanks with traffic-able roofs can be installed individually or grouped together in configurations of 2, 4, 6, 8 or above to provide a vast storm water storage system. All tanks are installed in record time without the need for any curing time on-site, allowing immediate vehicle traffic to keep your project moving forward.

Our OSD tanks come in two varieties to suit both residential and commercial projects

RESIDENTIAL

Suitable for domestic uses including homes and units where tanks may be situated below driveways.

Features:

- 3m x 2.5m x 1.2m
- 8,000 litre capacity
- Roof slab designed for 3kPa total loading
- Suitable for ride on lawn mowers
- Quick installation
- Group 4 together for total capacity of 32,000 litres

COMMERCIAL

Suitable for industrial and commercial uses including factories & warehouse facilities where tanks may be situated below driveways.

Features:

- 3m x 2.5m x 1.2m
- 8,000 litre capacity
- Roof slab designed for 30kPa total loading
- Suitable for truck traffic
- Quick installation
- Group 8 together for total capacity of 64,000 litres
